Hi Alice, thanks so much for the update. I will pass this on to the CWA Board and the WW Env. Comm. Doug, can you keep my name on the CAG email list? I thought I had been put on an earlier version. Also, I will pass on to Scott Dvorak at Trust for Public Land.

Best, Tirza

Subject: Status of Lower 8 Mile FFS release

Hi all,

So by now you have all noticed that the FFS and Proposed Plan was not released at the end of January. Because it is such a large, complex and unprecedented remedy under Superfund, it has gone all the way up to the EPA Administrator in Washington who has requested more time for internal conversations prior to its approval. While there is no firm release date, EPA is still expecting that it will be released soon. We will update you all as we know more.

thanks

Doug
